### REASONS FOR ALLOWANCE

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references cited on the PTO-892 each disclose an optical recording apparatus including a pre-pit signal generating circuit.

The following is an examiner's statement of reasons for allowance: the prior art of record considered as a whole fails to teach or suggest a recording apparatus for optical recording media in which pre-pits which carry recording position information are formed in advance and a data signal is recorded in accordance with the recording position information, comprising: a gate signal generating section for generating a gate signal in accordance with the data signal; a pre-pit signal generating section for generating a pre-pit signal from a signal read from the optical recording medium; a gate circuit for generating a pre-pit pulse train by allowing the pre-pit signal to pass there through in response to the gate signal; **a pulse extractor for extracting pulses of predetermined waveform from the pre-pit pulse train; and a synchronization signal generating section for generating a recording synchronization signal based on the pulses of predetermined waveform.** (bold language emphasized)

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication should be directed to Paul Huber at telephone number 703-308-1549.
